SUMMARY

Senior Full-Stack Engineer with 8+ years of experience architecting high-performance web applications, combining a deep frontend foundation with robust backend execution. Expert in client-server architectures, scalable REST APIs, agentic workflows, event-driven systems, and micro-frontends. Proven technical leader skilled in mentoring engineers, establishing technical best practices, and driving complex, end-to-end product delivery.

SKILLS

Languages & Frameworks: React, Node.js, TypeScript, JavaScript, Scala, NextJS, Vue, Microservices, LangChain

Tools & Infrastructure: AWS, MongoDB, IndexedDB, MCP, Claude Skills, WebSockets, Webpack, Vite, Jest, SpecKit

EXPERIENCE

Findem

Bangalore

Senior Software Engineer

04/2024 - Present

- Collaborated within a cross-functional, international team to design and ship high-impact AI-driven features and tracking frameworks.
- Engineered an MCP-based agentic workflow to securely expose internal applicant tracking data to LLMs, optimizing candidate screening.
- Integrated acquired SaaS product via route-based micro-frontends and built cross-stack data sync, directly increasing upsell by 15%.
- Architected a centralized asynchronous operations UI framework to track high-volume workflows, eliminating a major category of support tickets.
- Built end-to-end logic for core ATS features and onboarding workflows, streamlining candidate progression and data accuracy.
- Embedded custom debugging instructions into local Claude markdown skills to resolve candidate match scoring issues.

Zomentum

Bangalore

Software Developer

08/2021 - 03/2024

- Built and scaled Scala-based REST APIs using a BFF architecture to optimize data aggregation, minimizing payload overhead and accelerating integration.
- Optimized PDF generation latency, slashing rendering times by 66% (from 3s to under 1s) with dynamic headers, footers, and page numbering.
- Reduced digital signature process failures by 33% and raised satisfaction metrics by replacing internal logic with a stable PDFTron integration.
- Engineered an interactive, high-performance quoting and proposal module with drag-and-drop capabilities and real-time editing.

Zoho (SalesIQ)

Tenkasi

Software Developer

05/2018 - 07/2021

- Engineered client-side logging and caching using IndexedDB with automated data expiry, reducing API traffic by 90% (10x).
- Architected a real-time communication engine via WebSockets and a PubSub pattern to power live chat updates and dynamic modular listeners.
- Optimized application builds via Webpack chunk splitting and tree shaking, cutting load latency by 60% to drop render times from 5s to under 2s.
- Led and mentored a team of 3 engineers to deliver enterprise file sharing and audio calling features, boosting velocity by 10%.

PROJECTS

CreamBoard - Collaborative Whiteboard Application

[Live Demo](#)

- React/TypeScript whiteboard app featuring multi-workspace management, drawing tools, IndexedDB persistence, and PDF/PNG export.

EDUCATION

PSNA College of Engineering, Dindigul, TamilNadu

05/2018

Computer Science
